RE: PABCO® Gypsum Building Product Disclosure and Optimization–Sourcing of Raw Materials

PABCO® Gypsum operates two gypsum panel manufacturing plants in the United States at the addresses below:

- 8000 E Lake Mead Blvd.  
Las Vegas, NV 89115  
United States
- 37851 Cherry St  
Newark, CA 94560  
United States

Our Las Vegas facility utilizes naturally occurring gypsum mined from our adjacent mine and our Newark facility utilizes naturally occurring gypsum outsourced from an external mine. The mold-resistant coated glass fiber mat for the facings on our glass faced products is sourced from an external vendor.

5/8" PABCO GLASS® Sheathing Type X is manufactured at our Las Vegas facility using 7% pre-consumer recycled content..

Please contact PABCO® Technical Services for more information.

Thank you.
